## **DETAILED ACTION**

### ***Allowable Subject Matter***

**1. Claims 1-2 and 13-30 are allowed.**

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose nor render obvious the claimed invention of a working fluid injection apparatus for injecting a working fluid into a gap between a housing and a shaft of a bearing unit of a fluid dynamic pressure bearing, the working fluid injection apparatus comprising:

an adapter configured to support the bearing unit in a state in which an end portion of the bearing unit shaft protrudes from an open portion of the bearing unit housing; and a cover member having an upper opening, a lower opening, and a tapered inner surface with a radial dimension that increases gradually from the lower opening to the upper opening, the cover member being configured to be mounted in contact with an upper surface of the bearing unit housing when the bearing unit is supported by the adapter so that the lower opening of the cover member surrounds the open portion of the bearing unit housing and so that the protruding end portion of the bearing unit shaft and the tapered inner surface of the cover member form a reservoir portion that communicates with the open portion of the bearing unit housing and that is configured to store a working fluid. The closest prior art of record, Hayashi (PGPub 2004/0107577), discloses a working fluid injection with an adapter but does not disclose a cover member having the above recited limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
